### 700TVL 3-Axis Mini Dome Camera

#### Product Overview

Bavono BVO204F-X High Resolution Day/Night Mini Dome Camera utilizes 1/3" Sony Super HAD II CCD image sensor and the latest Digital Signal Processing (DSP) technology to deliver a high resolution of 700TVL. It is a compact and lightweight camera featuring built-in OSD and UTC (up-the-coax) control, a miniature exterior, easy installation, and a high price-performance ratio. UTC control technology enables control of the OSD menu via a coaxial cable with the use of a remote controller, which makes it easier and more convenient to set a camera after installation. Suitable applications include offices, factories, warehouses, restaurants, shopping malls, hotels, and retail stores.

#### Automatic White Balance

Colors are affected by different lighting sources and appear differently under sunlight due to the change in color temperature. Human eyes have the ability of adapting to the change in color temperature, but cameras often have difficulty adjusting so that what appears white to humans may not be rendered correctly in an image resulting in color deviation. Bavono cameras feature an automatic white balance function with a manual option which enables colors to be rendered correctly regardless of lighting source to eliminate the need to reset colors subsequently.

#### Digital Noise Reduction

DSP (Digital Signal Processing) cameras utilize special digital noise reduction algorithms to significantly eliminate signal disturbances and color noise. As a result, motion trails are minimized to deliver high quality images.

#### Absolute Color Accuracy

Bavono cameras utilize High Resolution Imaging to deliver more realistic colors and contrast enhancement.

#### Electronic Shutter

Electronic Shutter ensures clarity of objects in high speed motion. Shutter speed is directly proportional to image quality.
